

Keefe Customer Service Request

Communication with our customers whether they are selling or buying property with us has always been a cornerstone of our business, since 1943. The people we work with know the importance of being kept informed from the inaugural meeting, through showings, negotiations, the closing and after the close.

As of January 1, 2003 the State of Wisconsin has passed new legislation called the "Wisconsin's Telephone Solicitation Bill". This Bill raises questions about our ability to keep you informed and provide services to you as we have in the past. Without signing this rider we would not be able to communicate via the telephone pertinent information you may require such as updated listing data, market reports, financing evaluations, offer to purchase follow up, services from; surveyors, home inspectors, title companies, as well as other services which may be significant to your real estate transaction. This rider allows us to communicate with you, and keep you updated with the information that is pertinent to you. In addition to calling we may also fax, email and/or mail information to you.

(Seller) (Buyer) requests but does not require Broker to telephone (seller) (buyer) regarding issues, goods and services related to the real estate transaction.
