### Market Time

The average Days On Market (DOM) shows how many days the average Property is on the market before it sells. An upward trend in DOM tends to indicate a move towards more of a Buyer's market, a downward trend a move towards more of a Seller's market. The DOM for November was 166, up 69.4% from 98 days last month and up 33.9% from 124 days in November of last year. The November 2010 DOM was at a mid level compared with November of 2009 and 2008.

### Days On Market for Sold Properties

### Selling Price per Square Foot

The Selling Price per Square Foot is a great indicator for the direction of Property values. Since Median Sales Price and Average Sales price can be impacted by the 'mix' of high or low end Properties in the market, the selling price per square foot is a more normalized indicator on the direction of Property values. The November 2010 Selling Price per Square Foot of \$224 was down 17.5% from \$271 last month and up 0.9% from 222 in November of last year.

### Selling Price per Square Foot

### Selling Price vs Original Listing Price

The Selling Price vs Original Listing Price reveals the average amount that Sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. The November 2010 Selling Price vs Original List Price of 95.3% was up from 93.1% last month and down from 95.5% in November of last year.
